

Concerned about surgery costs?

Don't sacrifice on the care you need. Instead, make sure your physician takes you to an ambulatory surgery center (ASC) instead of the hospital outpatient department. ASCs offer patients convenient quality care at a more affordable price.

ASC vs. Hospital Outpatient Medicare Coinsurance¹

1. Medicare patient coinsurance payments are estimates based on calculating weighted averages of 2010 National Medicare rates weighted by the latest available Medicare ASC case volume data (2006). Patient coinsurance payments assume a standard Medicare Part B coinsurance rate of 20%. However, actual coinsurance amounts paid by patients may be higher or lower than dictated by the 20% coinsurance rate.
2. Plastic Surgery includes dermatology.

Talk to your physician to learn how Tuscaloosa Surgical Center is a better option for you clinically and financially.
